

Allday® Dry Mouth Relief

For your comfort and your health.

With 44% xylitol and a neutral pH to help reduce the risk of cavities, count on Allday® dry mouth spray and gel for fast, long-lasting relief.

Allday dry mouth spray and gel work differently than any other mouth moisturizers.

- Xylitol may help prevent cavities¹, which is why Allday mouth moisturizers contain more xylitol than any other ingredient.
- Unlike some other dry mouth products, Allday mouth moisturizers are made to a ~7.0 pH, because moisturizers with a pH below 6.7 may be harmful to teeth.¹
- The unique mucoadhesive hydrogel and high concentration of xylitol in Allday spray and gel act like saliva to instantly moisten and soothe your mouth.
- Allday mouth moisturizers are alcohol-free, gluten-free and sugar-free.

Use Allday mouth moisturizers as often as you need them throughout the day and night.

Try the mouth moisturizers your dental professional recommends. Order online today.
